

EP-55

WB Epoxy Primer

EP-55 WB Epoxy Primer is a two component, water-based epoxy primer designed to improve the adhesion of floor coatings over difficult to coat, or marginally prepared substrates. Substrates include; hard-troweled concrete, aluminum and various types of tiles. Hard Surface Primer can be top coated with most types of floor coating technologies including acrylic, epoxies and polyurethanes.

- Alternative to traditional mechanical and chemical surface preparation
- Excellent as a primer/basecoat for warehouse line striping, zone marking, solid color and decorative floor coatings - including metallic systems
- Can be top coated after 5 hours and before 7 days without sanding
- Compatible with most floor coating technologies including acrylic, epoxies and polyurethanes
- VOC compliant nationwide
