Citadel Polishing System

Citadel Polishing System is a complete product line formulated to extend the longevity of concrete flooring while enhancing its appearance, durability and ease of cleaning.

Citadel Polishing System products deliver easy application, quick return to service and transform new and existing concrete with increased hardness, improved stain resistance and long-term abrasion resistance.

These products are specially formulated for use with mechanical polishing to elevate virtually any concrete surface to a whole new level of beauty, functionality and strength!

Concrete Densifier

Concrete Densifier is formulated to penetrate and chemically bond with concrete, providing increased hardness, improved stain resistance, excellent durability and abrasion resistance. With mechanical polishing, it provides a beautiful decorative finish with enhanced color, gloss, and clarity.

FEATURES & BENEFITS

- Ideal for new or existing concrete
- Increases hardness and longevity of concrete surfaces
- Enhances polished color, gloss, and clarity
- Improves stain resistance
- Chemically bonds with concrete
- Ready to use, water based
- Easy application, no odor, quick return to service
- Minimizes concrete dust for healthier indoor air quality

Concrete Grout Coat

Concrete Grout Coat is designed to permanently fill small cracks, voids and other common surface imperfections on concrete floors. Our formula is fast setting, enhances the overall appearance of polished concrete and reduces surface irregularities that collect dirt and debris to ease routine cleaning and maintenance.

FEATURES & BENEFITS

- Ideal for new or existing concrete
- Fills surface imperfections to ease cleaning
- Enhances polished color, gloss, and clarity
- Ready to use, water based
- Easy application, no odor
- Requires no special polishing procedures
- Environmentally friendly

Concrete Polish Stain Guard

Concrete Polish Stain Guard provides increased stain resistance and color retention on densified, polished concrete floors. Formulated to penetrate polished floors, this non-film forming product offers easy application and quick return to service. Concrete Polish Stain Guard is ideal for use on polished concrete applications that require added protection from stains and dirt. This clear protectant enhances color and sheen while increasing surface durability.

FEATURES & BENEFITS

- Ideal for new or existing concrete
- Provides added protection from stains
- Increases longevity of concrete surfaces
- Enhances polished color, gloss, and clarity
- Fast setting, quick return to service
- Ready to use, water based
- Easy application, no odor
- Penetrating protectant, non-film forming
- Minimizes concrete dust for healthier indoor air quality
- Use over concrete dyes, reactive stains and integrally colored concrete
