Metallic System Characteristics

- Easy to use, fast return to service, and provides outstanding abrasion resistance
- Has the appearance of "marble-like" and "chameleon" color changing textures
- Coating is easy to maintain with no waxing or upkeep needed
- Finishes multiple surfaces (Concrete, Wood, Tile)

Pearlescence Metallic System

Pearlescence Metallic powder tints produce a marbled, extremely durable, high-end floor coating that contains pearlescent and iridescent accents with gleaming finishes. These lustrous floor coatings are one of the latest solutions for commercial applications, retail environments and for many residential customers looking to set their home apart from others. The uses for this revolutionary coating system are truly endless.

Pearlescence Metallic System coatings are available in a wide variety of colors to fit any customer's needs and wants. There is also an option to use multiple colors in order to create marble-like finishes and chameleon color changing textures.

Project Spotlight Boat Dealership

The owners of this boat dealership wanted to create a unique look for a showroom that could withstand heavy wear and offer a quick return to service. The ideal choice was a custom Pearlescence Metallic System coating.

The Citadel Pearlescence Metallic System coatings can replace tiles, laminates and wood flooring in apartments/condos, hotels, restaurants, hospitals, retail/commercial spaces or offices, as well as just about any application you or your customer can dream up.

For additional information about the Citadel Pearlescence Metallic System or other floor finishing systems, call (866) 765-4310 or visit citadelfloors.com
