Poly-Stone Natural Rock N' Resin Coating

CFFS POLY-STONE™ Natural Rock N' Resin Floor Coating is an extremely durable stone and hybrid epoxy resin matrix that is both durable and attractive for use on exterior and interior projects.

System Characteristics:

- ▶ **Strong enough for vehicle traffic.**
- ▶ **High impact and chemical resistance.**
- ▶ **Easy to maintain.**
- ▶ **Wide variety of color choices.**

CFFS POLY-STONE™ Natural Rock N' Resin Floor Coating has an average hardness tests exceeding 6,000 PSI, Poly-Stone is suitable for vehicle traffic, retail outlets and pool deck surrounds. Poly-Stone flooring is available in with an optional anti-skid topcoat application, making it approved by OSHA and the ADA as a slip-resistant surface. It is therefore compliant for public access and will decrease the chances of slip/fall injuries and hazards. Available in a wide array of color choices and blends, Poly-Stone can be customized to match the needs of any individual or company. Optional Aliphatic Polyurea topcoats can be applied to give the flooring system superior UV-resistance as well as abrasion, impact and chemical resistance in high traffic situations. Because there are voids in the matrix - dirt, water and contaminants do not sit on the surface and are not visible. This debris is easily cleaned through pressure washing or vacuuming, making Poly-Stone Natural Rock N' Resin coatings very easy to maintain.

SLE-100™ is a two component, 100% solids, cyclo-aliphatic hybrid coating system that has exceptional adhesion properties to concrete substrates. Due to its unique chemistry, this coating exhibits great flexibility, working times and self-leveling properties while offering great chemical resistance as well.

PERFECT FOR:

- | | | |
|------------------|---------------------------|------------------------|
| Auto Showrooms | Showrooms | Office Lobbies |
| Porches | Walkways | Common Areas |
| Furniture Stores | Commercial | Kitchens |
