

## **MEDICI™ POLYUREA COLOUR COATING SYSTEM**

### **FEATURING THE POLY-ONE™ SINGLE COMPONENT ALIPHATIC POLYUREA**

The **Medici™ Polyurea Colour Coating System** utilizes our Poly-One Single Component Aliphatic Polyurea that has 100% UV stability and is suitable for both interior and exterior applications. With the Medici™ Polyurea Colour Coating System you can create a wide variety of decorative finishes that will outlast any other acrylic or acid stain systems currently available. Unique floors are quickly installed using our proprietary **CFFS Dualie™ Roller** and the outcomes are as beautiful as they are strong. Custom texturing is possible via sponge rollers, while the virtually unlimited pot-life of the material allows plenty of time to create the desired look. With endless color combinations available, the installer is truly unlimited in their design and artistic finish. The high solids content and excellent abrasion resistance of the Poly-One makes it the optimal choice for all applications.

**THE COLORS SHOWN HERE MAY NOT BE EXACT DUE TO PRINTING PROCESS AND COMPUTER MONITOR LIMITATIONS.**

For absolute color fidelity, physical samples should be displayed for verification and confirmation of color choice before any installations. Any floors requiring anti-slip additives for traction should also be represented in the samples and signed off on by the customer prior to application.
