

BROADCAST SYSTEMS

Multiple Colored Quartz, Aggregates, or Vinyl Chips

Citadel's® Broadcast Systems are a special blend of multiple colored quartz aggregates, flint or vinyl chips that provide an attractive floor finish with long-term durability. This system is the ideal choice for applications where slip resistance and a quality appearance are required.

Chip Systems

Our chip systems provide decorative yet highly durable surfaces with the appearance of granite, marble or terrazzo. Our 2 layer, easy to install chip systems are our most popular seller with installers. Great for any garage, basement, bathrooms, and light commercial environments. Use R-G-80x™ as a top coat for ease of use.

BROADCAST SYSTEMS

Quartz Systems

A very strong durable coating with extreme abrasion resistance that maintains a rough texture that conforms to all OSHA slip requirements. Great application in all commercial kitchens, entry ways, industrial bathrooms, and heavy traffic areas. This is our main seller to customers for any commercial and industrial system. Unlimited color options for the quartz keeps the design options open for any decorative work. Usable on vertical surfaces, and with the installation of SPEED COVE, this system is a seamless, easy to clean durable surface that will work for many years.
