Citadel Polishing System

Benefits of the Citadel Polishing System

- Great for new or existing concrete
- Surface will be stronger and last longer
- Enhanced gloss, clarity and DOI (Distinctness of Image)
- Customize your concrete with our concrete stain system
- Excellent stain repellency and chemical resistance in commercial and industrial applications
- Cost-effective maintenance system designed for use with an automatic scrubber, providing a daily maintenance solution

The Citadel Polishing System is a complete product line formulated to extend the longevity of concrete flooring while enhancing its appearance, durability and ease of cleaning. Our products deliver easy application with ready-to-use, single component products that offer a quick return to service. Transform new and existing concrete with increased hardness, improved stain resistance and long-term abrasion resistance. Products are specially formulated for use with mechanical polishing to elevate virtually any concrete surface to a whole new level of beauty, functionality and strength!

Preparation

Concrete Grout Coat

Concrete Grout Coat is designed to permanently fill small cracks, voids and other common surface imperfections on concrete floors. Our formula is fast setting, enhances the overall appearance of polished concrete and reduces surface irregularities that collect dirt and debris to ease routine cleaning and maintenance.

Features & Benefits

- Ideal for new or existing concrete
- Fills imperfections to ease cleaning
- Enhances color, gloss and clarity
- Easy application with no odor
- Ready-to-use, single component, water-based formula
- Needs no special polishing procedures
- Environmentally friendly

Strengthen

Sodium Densifier

Sodium Densifier is formulated to penetrate and chemically bond with concrete, providing increased hardness, improved stain resistance, excellent durability and abrasion resistance. With mechanical polishing, it provides a beautiful decorative finish with enhanced color, gloss and clarity.

Features & Benefits

- Ideal for new or existing concrete
- Increases hardness and longevity of concrete surfaces
- Enhances color, gloss and clarity
- Ready-to-use, single component, water-based formula
- Improves stain resistance
- Chemically bonds with concrete
- Easy application with no odor and a quick return to service
- Minimizes concrete dust for healthier indoor air quality

Lithium Densifier

Lithium Densifier is extremely easy to use and is specifically designed for concrete polishing. Applied during the polishing process, this impregnating hardener improves the final appearance by creating a significantly harder surface that allows abrasive tooling to work more effectively to achieve a superior polish. This product increases gloss and clarity, improves overall abrasion resistance, and reduces dusting. Lithium Densifier is a simple, one-coat application with no brooming or rinsing required during application.

Features & Benefits

- Simple application
- Specifically designed to harden concrete and terrazzo for polishing
- Formulated to allow abrasive tooling to work more effectively
- Improves abrasion resistance and reduces dusting
- Preserves the natural look of the surface
- VOC compliant

Protect

Sodium Stain Guard

Sodium Stain Guard provides increased stain resistance and color retention on densified, polished concrete floors. Formulated to penetrate polished floors, this non-film forming product offers easy application and quick return to service. Sodium Stain Guard is ideal for use on polished concrete applications that require added protection from stains and dirt.

Features & Benefits

- Ready-to-use, water-based formula
- Easy application with no odor and a quick return to service
- Penetrating protectant, non-film forming product
- Enhances color, gloss and clarity
- Minimizes concrete dust for healthier indoor air quality
- Use over concrete dyes, reactive stains and integrally colored floors

Lithium Stain Guard

Lithium Stain Guard enhances the appearance and extends the longevity of polished, integrally colored, dyed and stained concrete, adding shine, protection and abrasion resistance. This water-based, lithium-fortified product dries quickly to a clear, extremely hard micro-coating that bonds and protects the substrate.

Features & Benefits

- Outperforms and eliminates the need for waxes, polishes and acrylics
- Enhances color and increases abrasion and stain resistance
- Easy application with no odor and a quick return to service
- Forms a protective micro-coating that is breathable, hard, and will not peel or flake
- Reapplication is simple and doesn't require stripping
- VOC compliant

Color

Concrete Stains

Concrete Stains are formulated to create a beautiful, durable finish and to harden and protect interior and exterior concrete surfaces. For application on overlays, profiled concrete and exterior concrete, this product utilizes lithium densifying technology to anchor the color to the concrete.

Features & Benefits

- Creates a strong finish that resists staining, deterioration, and is UV stable
- Meets OSHA and ADA coefficient of friction standards
- Ready-to-use, water-based formula
- All-in-one, breathable sealer that will not peel, flake, blister or delaminate
- VOC compliant

Maintain

Clean & Defend

Clean & Defend cleans floors by cutting through dirt, grime and residue. In addition to cleaning, this innovative product features reactive nano-lithium particulate to harden, protect and restore the gloss and durability of the concrete surface. Using this product will increase a floor's longevity, and reduce maintenance and repairs.

Features & Benefits

- Removes dirt and grime without leaving a residue that will dull or damage a floor or floor finish
- Reduces the need for periodic buffing or burnishing
- Helps resist scuffing, scratching and water spots
- Amplifies overall gloss and clarity with nano-lithium technology
