

Metallic Effect Cumulus

Cumulus creates a one-of-a-kind 3-dimensional look that “stratifies” with the application over top of a metallic base, while wet. The application of the Cumulus allows the underlying metallic to come through while creating vein like patterns throughout the coating.

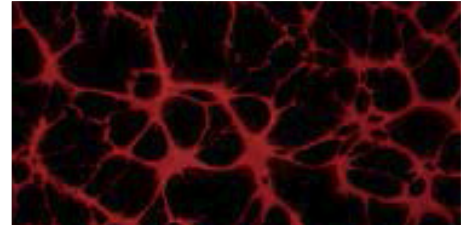

Black Cumulus applied over Citadel Metallics (Shown in 5 colors below, works in all Citadel Metallic colors)

Amaretto

Brilliant Blue

Cherry Bomb

Silver Bullet

Gunmetal

- ▶ Apply Cumulus to SLE Metallic, wet on wet, approximately 15-30 minutes after applying the SLE Metallic
- ▶ Sold in a 64 oz kit (black) - approximate coverage is 300 square feet
- ▶ Dry Times at 70-80 F and 50% Relative Humidity.
 - Foot Traffic – 12 - 16 Hours
 - Vehicle Traffic – 48 Hours
 - Full Chemical Cure - 7 days
 - Mix ratio 3A:1B
