

Ultra Hydro Stop

100% Solids Epoxy Primer

Ultra Hydro Stop Primer is a two component, 100% solids, fast setting epoxy primer used to remedy damp concrete floors. It is unaffected by high pH levels up to 14, making it the perfect solution on any concrete surface.

- Tenacious adhesion to damp concrete reducing moisture vapor transmission (MVT) to acceptable levels
- Emits virtually no odors and can be applied indoors with minimal disturbance to surrounding activities
- Excellent self-leveling properties increase hiding power over damaged substrates
- Can be used as a green concrete primer
- Expedites return to service with a fast tack free time of 4 hours at 72°F
- Odor reducer/barrier
- Available in clear and two pre-tinted colors and can be used as a broadcast coat

Material	Description	Size
359082	Light Gray Gloss	5 Gal Kit
