

RG-70

Polyaspartic Floor Coating

RG-70 is a two component polyaspartic floor coating that provides excellent UV, chemical, abrasion and heat resistance (up to 350°F) and has a 24 hour return to service time. RG-70 is available in both gloss and satin finishes, is VOC compliant nationwide and can be applied at temperatures from 30°F to 90°F. RG-70 is a versatile coating that can be used as a clear topcoat over a smooth surface or as a two coat process over chip/quartz broadcast. RG-70 is sold clear, but may be pigmented using 844 universal colorant.

- Fast return to service time, can accept vehicle traffic in 24 hours
- UV Stable, excellent chemical, abrasion and heat resistance
- Can be applied at temperature between 30°F to 90°F
- Available in gloss and satin finishes
- VOC compliant nationwide
