Ultra-Hydro Stop Primer™

Ultra-Hydro Stop Primer is a two component, 100% solids, moisture vapor transmission (MVT) blocking and pH resistant epoxy primer used to remedy concrete floors with high moisture levels before the application of finish coatings. Capable of holding back up to 25 lbs. of MVT, this primer has excellent adhesion to even the most moisture laden concrete slabs. Ultra-Hydro Stop Primer also exhibits great self leveling properties and is unaffected by high pH levels up to 14, making it the perfect solution on any concrete surface.

Additional Features:

- Displays excellent adhesion characteristics to concrete.
- Long working time eases in the spread of the mixed material.
- Resistant to high alkalinity floors up to 14 pH.
- Holds back up to 25 lbs./1000 sf/ 24 hrs. as measured using anhydrous calcium chloride tests.
- Will provide a glossy smooth finish when cured.
- Excellent self leveling properties increase hiding power over damaged substrates.
- Pure epoxy chemistry makes it resistant to deterioration from internal concrete conditions.
- Easy to mix 3:2 ratio, packaged in convenient kits.
